

### Interactive Dashboards in your Business Intelligence Platform

**Xpand IT has just released a new version of the free *plugin* that offers an amazing visual experience for the Pentaho Business Analytics Users**

The Pentaho FusionCharts Plugin 1.0.0 aims to improve the visual aspect of business dashboards for all community of Pentaho users. This plugin combines the functional aspect of the Business Analytics platform with the great visual effects of the FusionCharts suite. The new version of this plugin was released last June 22 and may be freely downloaded through the Xpand IT website.

The FusionCharts library implements interactive charts and maps, allowing a unique visual experience. This release leverages the XT version functionality to enhance mobile device usage. This is achieved through the new *html5* widgets that look as great as the *Flash* version and also the touch support. In addition, some improvements were added to the plugin allowing the usage of real-time charts and scroll widgets.

Xpand IT is a Pentaho official partner and FusionCharts reseller. These strategic alliances allow offering the best solutions to our customers by combining technologies and in the end improving user experience. FusionCharts is a leader solution in the enterprise class market with over 20.000 customers and 450.000 users in 118 countries.
